

Why They "Say Yes To SEYI"

Don't Just Take Our Word...
Our Customers Say It Best!

Walker Corporation

SEYI gap frame, straight side, and link motion presses have been solving customer challenges for decades. In fact, our customers are often our best salesmen. Here are just three from of our several hundreds of North American successes:

Walker Corporation (Ontario, CA):

"We initially chose SEYI's due to the initial purchase "value" when used in smaller electronic work...later we found them more than capable of meeting quality levels and larger lot size productivity when running bigger, thicker automotive parts."

Richland Manufacturing

Richland Manufacturing (Olney, IL):

"Facilitating increasing amounts of progressive die work was our challenge...and SEYI has helped us double the press speeds...our Smart-PAC2 control makes it a very intelligent press in many ways."

**Great Lakes Metal Stamping
(Michigan & Alabama plants):**

"SEYI's up-front analysis work showed us how we'd be more effective on tighter tolerance stamping work...and their gap frames and straight sides have excelled in our high production environment ever since."

Great Lakes Metal Stamping
