

What's Your Missing "Link"?

Say yes to

SEYI

Link Presses

SEYI's link motion design...

- decreases shock, noise, heat & vibration to extend die life
- reduces material spring back due to slide velocity slowdown (dwell time)
 - increases throughput via faster approach and return slide speeds
 - draws, forms and blanks...all in a single machine

Experience SEYI's overall value and "Say Yes" commitment to your success. Give us a call.
